The MDT Motion Detector/Automatic Switch with light sensor captures the smallest movements with its built in pyro detectors and high resolution lens. It is possible to configure 2 separate light channels, one HVA channel and one channel for room monitoring. The brightness of the room is measured by the integrated light sensor and made available as an object.

After motion detection and below an adjusted brightness value a 1Bit („1“) telegram, 1Byte dimming value (0...100%) or a scene call („ON“) is send to the bus. The sensitivity is adjustable in 10 steps. If there is no movement a 1Bit („0“) telegram, an 1Byte dimming value (0...100%) or a scene call („OFF“) is send to the bus after an adjustable follow up time.

Different light scenes can be controlled via the day/night object. Additionally there are master/slave, semi/full automatic operation, forced operation/block and logic functions available.

Fits 55mm systems/ranges:

- GIRA Standard 55, E2, E22, Event, Esprit
- BERKER S1, B3, B7
- JUNG A 500, A CREATION, AS 500, A550, A FLOW
- MERTEN 1M, M-Smart, M-Plan, M-Pure

The MDT Motion Detector is a flush mounted device for fixed installations in dry rooms. For project design and commissioning of the Motion Detector it is recommended to use the ETS. Please download the application software at www.mdt.de/downloads.html
