

## HOW COULD I KNOW IF A LG SYSTEM CAN BE CONTROLLED WITH ZENNIO GATEWAYS?

1. Identify the model of **indoor units** in the LG system.

2. You should extract the characters corresponding to the model of indoor unit. Below you can see some examples of indoor units and the characters that correspond to the model:

	Model	Outdoor unit	Indoor unit	Table model
Residential	AM09BP.NSJ	AM09BP.UA3	<b>AM09BP.NSJ</b>	→ <b>AM-BP</b>
Commercial	CB12L.N22	UU12W.ULD	<b>CB12L.N22</b>	→ <b>CB-</b>
Multi V			ARNU24GTPC4	→ <b>ARNU-GTPC4</b>

1. **Find that model in the compatibility table below** and check if it is compatible with KLIC-LG1.

If a model of LG indoor unit is not in this list, please, consult with **Zennio Technical Support** <http://support.zennio.com>

## COMPATIBILITY OF LG INDOOR UNITS WITH KLIC-LG1
