CONTROL YOUR BUILDING

The MultiConcept centers around a technical grid in the building,
designed to give maximum flexibility, comfort and energy control.
It enhances quick installation and flexible adaptation to
room functionality and space.

NS-EN 15232: 2012

**Smart &
installation friendly**

Enjoy time-efficient plug and play
with Wago or Wieland system plugs.
Think grid, move walls, remove
walls, repurpose your space.

It's all quick and flexible.

Open integration

Thanks to KNX, all data from each
room are fully available for the
building management system
and other KNX devices.

Optimize comfort and
minimize energy usage.

**Decentralized
lighting control**

Decentralized KNX – DALI gateway
and constant light control in your room.

Fast commissioning, easy
installation and efficient
lighting control.

**Ideal temperature
and lighting control**

Users empowered to influence
temperature, lighting and blinds.

Experience enhanced well-being and
productivity in the work space
combined with economized
room control.

**Optimized
HVAC control**

Get demand controlled heating,
ventilation and air conditioning
by easily connecting your
HVAC in each room.

Minimize your energy costs
and improve climate
in the building.

**Room control
by one KNX device**

Optimize your room with multiple
functions in one single KNX device.

Leads to time efficient installation
and commissioning.
